CONSULTING

**PMI-Construction  
Professional (PMI-CP)<sup>TM</sup>**

## Become a **CERTIFIED** Construction Project Manager

Research shows that \$127M is wasted for every \$1B spent on construction projects. PMI's Construction Professional (PMI-CP)™ sets the global standard for bringing large, complex construction projects to life on-time and on-budget.

### Learn the skills, get certified, and build a career in construction management

"Megaprojects demand mega skills. Build yours with the PMI Construction Professional™ certification."

## Launch and Grow your Career in the Construction Industry

### What is PMI-Construction Professional (PMI-CP)™?

PMI Construction Professional (PMI-CP)™ is a certification offered by the Project Management Institute (PMI), specifically tailored for professionals in the construction industry.

The PMI-CP is the only internationally recognized certification that offers an in-depth curriculum on the construction industry.

This advanced certification empowers working professionals — like YOU — to elevate your career. It prepares construction project managers to lead, plan and manage contracts.

### Course Overview

The PMI-CP program comprises four comprehensive modules designed to empower you with the knowledge and expertise needed for success in the built environment:

#### Module 1:

### Construction Project Communications

Today's large engineering and construction projects are incredibly complex, raising the requirements for effective communication.

The module covers:

- The Importance of Effective Communications.
- Building a Communication Strategy and Plan.

- Managing Stakeholder Communications  
Active Listening.
- Establishing Appropriate Governance Structures
- Using the Big Room (Obeya)
- Commitment-Based Management (CBM)
- Project Management Information System (PMIS)
- Evidence-Based Communications: The Compass Diagnostic Tool.
- Capstone: Putting it All Together.

#### Module 2:

### Scope and Change Order Management in the Built Environment

- The Importance of Effective Communications.
- Building a Communication Strategy and Plan.
- Managing Stakeholder Communications  
Active Listening.
- Establishing Appropriate Governance Structures
- Using the Big Room (Obeya)
- Commitment-Based Management (CBM)
- Project Management Information System (PMIS)
- Evidence-Based Communications: The Compass Diagnostic Tool.
- Capstone: Putting it All Together.

### Module 3:

## Construction Interface Management

Get the required skills to transform the global construction industry and bring large, complex projects to life.

- Interface Management
- Interventions Throughout the Project Life Cycle
- Attributes for a Good Interface
- Interface Management Tools and Design Processes
- Effectively Manage Interfaces
- Capabilities Needed for Interface Management
- Capstone: Putting it All Together

### Module 4:

## Contract and Risk Management in the Built Environment.

Understand contract management and risk mitigation strategies in construction projects.

- Contract Life Cycle
- Contract and Delivery Method Strategies
- Risk Management
- Common Causes of Claims
- Managing Claims and Disputes
- Capstone: Putting it All Together

## The Examination Content

Domain	Percentage of Items on Test
i) Contracts Management	50%
ii) Stakeholders Engagement	30%
iii) Strategy and scope Management	15%
iv) Project Governance	5%
<b>Total</b>	<b>100%</b>

## Why Choose PMI-CP?
